AN INTRODUCTION TO UNHIRED

AI Employees that give your team its time back.

Who we are, what an AI Employee does inside a business like yours, the work we've built for clients, and why an AI Employee is there to support your people, not replace them.

- Built since 2021
- Clients across North America and the UK
- At least 50% savings, guaranteed

01 · WHO WE ARE

An Edmonton team building AI Employees since 2021

Unhired was founded by Brandon Upright, born and raised in Edmonton. Since 2021 we've been building, training and maintaining AI Employees and custom AI systems for small and mid-sized businesses all over North America.

02 · WHAT AN AI EMPLOYEE IS

IN ONE PARAGRAPH

An AI Employee is an intelligent AI built to take on a specific role and set of tasks inside your business, the way a human employee does. It works inside the tools you already use. We build it, train it on how your business operates and maintain it for you, so nobody on your team has to manage it.

- Answering calls and emails
- Booking appointments
- Following up with customers
- Keeping records and CRMs current
- Bringing in and sorting new leads
- Automating systems and workflows

03 · BUILT TO EMPOWER YOUR TEAM

Your people keep the work only people can do

THE AI EMPLOYEE TAKES	YOUR TEAM KEEPS
The repetitive admin that fills up the day	Relationships with your customers
Data entry and keeping systems in sync	Judgment calls and decisions
Follow-ups and reminders that slip when it's busy	The skilled work they were hired to do
After-hours requests that would otherwise wait	Final say on anything the AI prepares

Empower, not replace

Our goal is to show you first-hand how AI can **empower your team, not replace them**. An AI Employee takes pressure off staff who are at capacity, so a small team can handle more without burning out, and your growth doesn't have to wait on the next hire.

04 · THE BENEFITS

An AI Employee next to a new hire

Before you post the next job, compare what you get for the money. For the tasks an AI Employee can take on, here's how the two stack up.

	A NEW HIRE	AN AI EMPLOYEE
Hours	A set shift, usually weekdays	24 hours a day, 7 days a week, 365 days a year
Time off	Sick days, vacation and lunch breaks	Never takes a day off or a lunch break
Getting started	Job posting, interviews and weeks of onboarding	We build it and train it on how your business operates
Turnover	When they leave, you hire and train all over again	Stays on, and keeps what it has learned
Who manages it	You or a manager, every day	We maintain it, including changes, updates and training
Visibility	Check-ins and status meetings	A custom dashboard of everything it's doing and has done
Commitment	Payroll, benefits and employment obligations	Monthly, no long-term contract. Pause or cancel anytime
Cost	The full salary plus the cost of hiring	At least 50% less than a human in the same role, guaranteed

50%+ savings

Our guarantee

If you keep your AI Employee, we guarantee it costs at least 50% less than hiring a human to do the same job. We agree on the role's salary with you before we build anything, so there are no surprises.

Nothing technical for you

It works inside the systems you already use. Your team keeps working the way they do now.

You stay in control

Correct it, answer its questions and see performance metrics from your dashboard.

Room to grow

Need more than one role covered? We build AI Employee Teams for larger businesses.

05 · OUR WORK

AI Employees we've built

A few of the AI Employees working inside our clients' businesses today. Client names are left out to respect their privacy.

01 Marketing and admin AI Employee

Real estate agency · Jersey, UK

- Creates all of their Facebook and Instagram images automatically
- Handles appointment booking
- Keeps the CRM up to date with no manual data entry
- Brings in leads from Facebook and Instagram ad forms and adds them to the CRM
- Creates a marketing report for each of their clients every month

02 Sales operations AI Employee

Skincare brand · Edmonton, AB

- Keeps every wholesale account organized in one place
- Tracks follow-ups so no account gets missed
- Gives each team member a prioritized to-do list so they know what to work on next

03 Business development AI Employee

Commercial real estate · Los Angeles, CA

- Finds new potential clients for the business
- Qualifies them before they reach the team

Over $15 million of new potential business brought into the pipeline

04 Client success and events AI Employee

Membership and coaching business · Alberta

- Helps onboard new clients
- Keeps client outreach going on a regular schedule
- Handles event signups: RSVPs, guest details and confirmation emails
- Keeps the team's client list in sync so everyone works from the same information

05 Sales and lead management AI Employee

Garage construction company · two brands

- Captures every quote request and keeps track of it
- Keeps the sales pipeline updated
- Flags missed follow-ups and anything unusual in the numbers so the owner sees problems early
- Creates AI renderings that show customers what their new garage could look like

06 · IN OUR CLIENTS' WORDS

What business owners say

> *"Brandon and his team built us our own AI employee to assist our marketing team with our day-to-day operations, as well as a custom dashboard to go with it. Our team now saves at least 10 hours per week across our marketing and sales department, thanks to the AI."*
>
> **Anthony M** · Premier Built Garages · Edmonton, AB

> *"Our AI Employee helps monitor all of our conversations with our leads to spot opportunities and potential gaps. It helps us prioritize who to focus on and what action steps to take next. Now nothing slips through the cracks. Our sales conversions have doubled in the last 60 days thanks to our AI."*
>
> **Ana U** · St. Albert, AB

> *"Working with Brandon and his team has been a dream come true for our business. We now have 2 different AI employees that allowed us to keep our team small, and also relieve the pressure off of many of our staff members. AI employees are the future of work, and Brandon makes it very simple to get them up and running in your business."*
>
> **Keller P** · Leduc, AB

07 · THE PILOT

Your first AI Employee, free for 30 days

1

The visit

We come to your business and interview your team.

2

Opportunity Map

Every task, the hours it takes and what AI can do. Yours to keep.

3

The build

Your AI Employee, set up in the tools you already use.

4

30 days live

It works on your real work at no cost to you.

5

The review

Keep it at 50%+ savings, or we part ways and you pay nothing.
